

NYI NYI MYINT MYAT

SOFTWARE DEVELOPER

ABOUT ME

Enthusiastic **Junior Developer** with a solid foundation in the **Spring Framework**, **Spring Boot**, RESTful API development, **Flutter** and database integration. Experienced with JPA, Hibernate, Redis, rate limiting (Bucket4j), logging using AOP, JWT authentication, and basic microservices concepts including OpenFeign, Eureka Service Registry, Spring Cloud API Gateway, and Spring Cloud Config Server. Passionate about writing clean, maintainable code and continuously learning new technologies. Eager to contribute to meaningful projects, deliver efficient backend solutions, and grow under the mentorship of experienced professionals.

Education

- **Matriculation Examination** — Passed in 2020
- **Studied Computer Science, IT Strategy and Management and Japanese Language** — Metro IT and Japanese Language Center, 2023 Jul – 2024 Dec

Certificates

- **Fundamental Information Technology Engineer Examination (FE) Certificate**
- **Spring framework for java developer from Udemy**
- **Dart Mastery from Zero to Mastery Certificate from Udemy**

Projects Experience

1. MicroServices Basic

User Service, Order Service, Product Service. Developed using Spring cloud config server, Api gateway, Eureka Service Registry

2. Restaurant Management System (Desktop Version)

Built using Java, JavaFX, WebSocket, and MySQL. Focused on creating real-time updates and managing restaurant orders and inventory.

3. Meeting Room Request System (Mobile Version)

Developed using Flutter (frontend), Spring Boot (backend), and MSSQL (database). Includes real-time availability checks to prevent double bookings. Integrated Java Mail Sender to notify users about request status (approval/rejection).

Android Porfolio App

[Get from GitHub](#)

4. Android Gallery App

Built with Flutter and SQLite to store photos with memory quotes, along with favorite and delete functions.

5. Flutter Note App

Implemented CRUD functionality with SQLite for offline note storage.

6. Portfolio Android App

Interactive application showcasing personal projects, with detailed descriptions and a user-friendly interface. Built using Flutter

Working Experience

Power Platform Developer (Power Apps, Automate, MSSQL, SharePoint)

City Properties Co., Ltd. - [Oct-2024 to Present]

Developed and deployed enterprise-grade applications with a Focus on streamlining business processes using Power Apps, Power Automate, and SQL Server. Also, actively collaborated with teams to design and maintain custom solutions that drive operational efficiency.

Key Projects at City Properties

- **Invoicing System:** Developed a solution to manage water and electricity meter fees using PowerApp, Power Automate and SQL server
 - **Diesel Order System:** Maintain, upgrade existing function and add new feature for diesel ordering and management process. And also reporting to improve efficiency, accuracy and overview for summarize data
 - **Asset Management System :** A centralized solution for tracking, organizing, and maintaining assets. Include asset registration, maintenance scheduling, depreciation tracking and reporting.
 - **SDLC Milestone Tracker:** Developed a project tracking app for software development life circle, enabling milestones definition for each project, and monitoring their completion status including early or delayed delivery.
-
